RE: Division Orders 92A and 92B

Dear Mr. Haddock:

1. Order 92A - we have changed page 3-64G (copy attached), which reflects our proposal to change the drainage to an out slope drainage pattern. If approved, we will change the drainage pattern in the vicinity of our well house in the next 30 days. Also, we have met with UDOT officials, and reached an agreement allowing us to repair the erosion channel in this area for them. We expect this work to be completed in the next 30 days. We will examine the rest of the conveyor bench, and determine what changes need to be made, and submit an additional proposal that can be accomplished in conjunction with the construction of the overland conveyor, with the objective of working towards final reclamation.
2. Order 92B - we have changed page 3-26 to comply with this order. A copy of that page is attached, along with a typical design of installing the gabion and jersey barriers. We have

reflected this change on Map 3.2.1-1. Work can start on this project as soon as approval is obtained, as we have a contractor, on site, ready to start the project.

If you need any additional information, contact Keith Zobell.

Sincerely,

A handwritten signature in black ink, appearing to read "Kenneth E. May". The signature is fluid and cursive, with a large initial "K" and a long, sweeping underline.

Ken May

Mine Services Manager
